PROJECTS :-

TIC-Reports, 12 Months

Tic reports is a dynamic web application designed to streamline the generation and distribution of reports on a daily, weekly, monthly, quarterly, and yearly basis. These reports are systematically dispatched to the Federal Reserve Board of the US government. The platform not only facilitates efficient reporting to regulatory authorities but also empowers users with comprehensive access to the report contents. Tic reports is a web application that generates various reports daily, weekly, monthly, quarterly and yearly reports and these reports will be sent to the Federal Reserve Board of us government and through this web application users will be able to see all the generated reports contents and can download the reports and we also show the graphical data based on the report data

Basel, 20 Months

BASELHUB is a web application designed for calculating essential financial metrics, including Probability of Default (PD), Loss Given Default (LGD), and Exposure at Default (EAD) for WM (Wealth Management) Securities Based Lending products. The platform offers a user-friendly interface for setting rules, enabling seamless customization through the UI. Its capabilities extend to report generation and visualization of defaulted accounts, providing comprehensive insights into risk assessment and financial exposure.

OTHER INTERESTS:- Listening to Music, Video Games

NOTABLE ACCOMPLISHMENTS ACROSS THE CAREER:-

Accomplishment Summary: Application Revitalization:-

Led a transformative initiative within the team to resolve critical issues affecting a portfolio of 12 applications. Identified that the majority of these applications were non-functional in non-production environments and unable to handle the workload. Spearheaded an effort to rejuvenate and restore their functionality, resulting in improved performance and reliability across the entire application suite.

Comprehensive Environment Setup: Successfully established and configured all applications in non-production environments, meticulously ensuring seamless functionality across various testing and staging phases.

Strategic Problem Solving: Overcame challenges associated with non-functional applications, systematically diagnosing issues and implementing effective solutions to bring each application back to operational status.

End-to-End Revitalization: Took ownership of the entire revitalization process, from troubleshooting and debugging to implementing robust solutions, resulting in the successful restoration of all 12 applications.

On The Spot Award:-

Received On The Spot award 3 times for the outstanding performance in the team

SOFT SKILLS:-

Positive Attitude Analytical Skills

Leader/ Team Player

Interpersonal Skills
